FlexSpace 5G

Elevating productivity and
experience while bolstering
device security & connectivity

Why seamless connectivity matters?

In today's interconnected world, seamless connectivity is indispensable for both PCs and smartphones. With the rise of hybrid and remote work models, along with the increasing reliance on cloud-based collaboration tools and applications, the need for robust connectivity has never been more critical.

Wherever your team works—home, office or on the move—reliable connectivity ensures uninterrupted access to essential resources, fostering seamless collaboration.

Organizations must leverage cloud-based technologies for collaboration and communication and invest in reliable connectivity solutions

for flexible work arrangements and cloud-based technologies. This ensures high-speed internet access for PCs and smartphones and empowers workforce productivity and engagement.

Redefining a new-age workplace experience with HCLTech FlexSpace 5G

Introducing HCLTech FlexSpace 5G, an advanced digital workplace experience-as-a-service that boosts efficiency and security for global businesses. It is through the confluence of superior 5G connectivity, best-in-class hardware capabilities and comprehensive IT support services.

FlexSpace 5G supports the entire workplace experience value chain and enables a smooth transition to a digital workplace for all categories of employees, whether at the desk, remote, on-the-go or on the frontline.

Equipping organizations with the necessary tools for productivity, FlexSpace 5G provides a reliable and secure network infrastructure that is designed to support hybrid workforces. It enables access to critical applications and data from any location while ensuring enterprise-grade security to safeguard confidential information.

Trends shaping workplace connectivity and security

- **60%** of enterprises view employee mobile technology usage as a major threat to corporate data security
- Over **43%** of US companies cite network security as their top concern
- **40%** of US companies have a predominantly remote or hybrid workforce
- **96%** noted a boost in employee productivity from connectivity investments, with **61%** witnessing increases that exceeded **10%**
- **44%** prioritize boosting worker productivity and collaboration, with **43%** focusing on enhancing employee connectivity options

Why FlexSpace 5G?

Enterprises are increasingly prioritizing robust connectivity solutions to meet their digital infrastructure needs. With the emergence of 5G, businesses are transitioning from traditional WiFi to ensure

secure, reliable and high-speed connectivity for remote, hybrid and mobile work environments.

HCLTech and Verizon Business have unveiled Flexspace 5G with multiple OEM partners

featuring enhanced responsiveness, security, low latency and high speeds, making it perfect for cloud-based applications and next-gen business tools.

Together, we empower organizations with:

Seamless connectivity

Experience uninterrupted connectivity with the power of 5G technology, ensuring your team stays connected no matter where they are

HCLTech

Provides end-to-end experience-led device lifecycle services

verizon business

Provides connectivity with data plan plus activation and billing

Device OEM

Provides connected laptop with 4G/5G cellular modem

Enhanced collaboration

Foster collaboration like never before with integrated tools and features that streamline communication and teamwork

Unmatched security

Safeguard your sensitive data with advanced encryption protocols and robust security measures, providing peace of mind in an ever-evolving digital landscape

Extensive device catalog

Our extensive catalog of connected laptops is optimized for different personas to enhance productivity and elevate your work experience

AI-powered insights

Harness the power of artificial intelligence to gain valuable insights and optimize productivity across your organization

Customizable workspaces

Tailor FlexSpace 5G to suit your unique business needs with customizable workspace configurations and flexible deployment options

Scalability

Scale your digital infrastructure effortlessly as your business grows, ensuring that FlexSpace 5G adapts to your evolving needs seamlessly

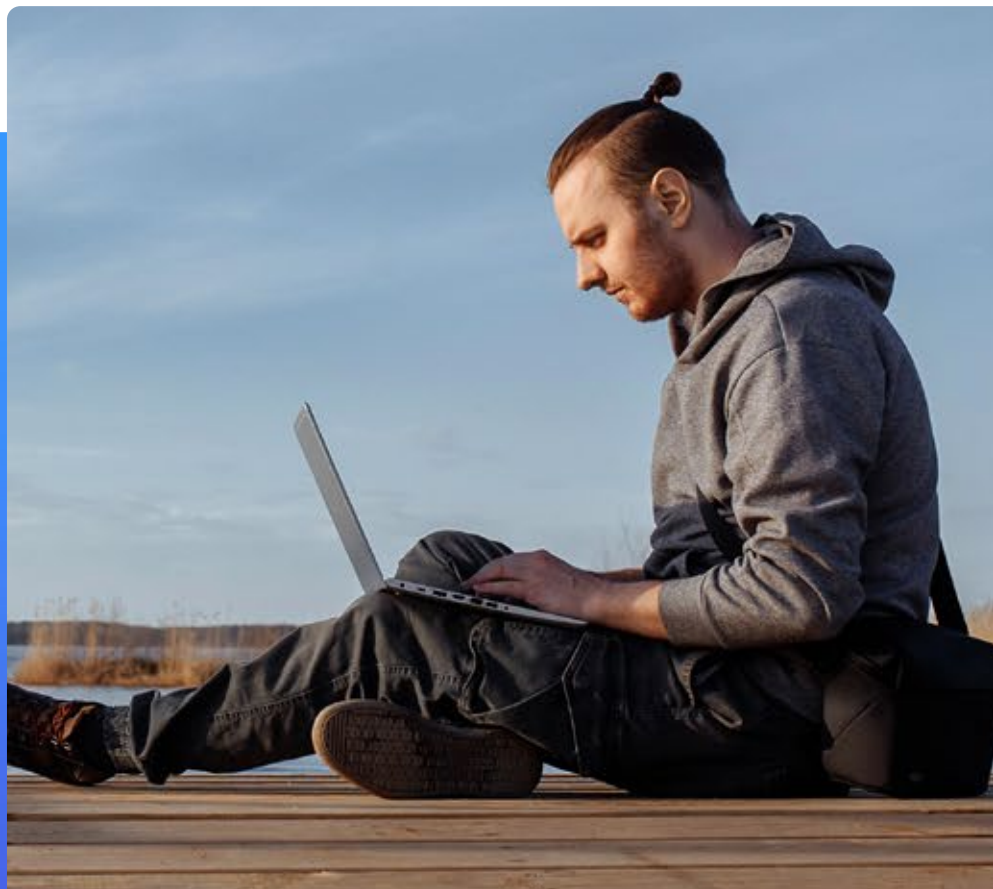

FlexSpace 5G solution construct

Bringing the best of devices and services at a single, predictable monthly price per seat

Benefits

- Enhanced mobility**
Uninterrupted productivity on the move
- Faster connectivity**
Consistent high-speed internet access
- Improved performance**
Low-latency network for efficiency
- Enhanced security**
Safe and secure online experience

- Reduced Wi-Fi dependency**
Reliable connection beyond Wi-Fi

- Improved battery life**
Quick charging cycle compared to non-5G devices

Use cases

Consulting

Financial advisor

Meeting a client over lunch with connected laptop means you are always present online knowing your information is secure in transit without having to connect to the client's home network or public Wi-Fi

Healthcare

Personnel

Professionals working within the healthcare industry are no longer bound to a fixed workstation that requires a lengthy boot-up time. Connected laptops enable the secure transfer of large - scale medical files, such as medical records and images, for expedited review

Creators

Content creators

Graphic designers, video editors and animators doing complex data modelling and analysis could benefit from a connected laptop capable of running applications virtually anywhere

Construction

Onsite contractor

Whether at a residential home or commercial building or renovation, being able to grab documents, schematics and specifications from the cloud and check on the status or real-time plan changes could be critical for someone working in the construction industry

Oil and mining

Workforce engineers

Operating on oil rigs and in mining exploration can benefit from rugged versions of connected laptops that offer next -level performance, no matter the environment

Education

Students/professionals

Connected laptops offer consistent and reliable access to content, allowing for meaningful and rewarding collaboration among education professionals

Case study

Enhanced workplace productivity with 5G-connected laptops for a major insurance provider

18M

Insurance customers supported

13K+

Agents equipped with 5G laptops

Challenges

- Mobile hotspots were distributed to claims agents and adjusters at the onset of the pandemic, but end-users generated substantial amounts of data
- Limited software accessibility on tablets and iPads
- Reliance on outdated DOS Green Screen systems to make backend adjustments

Solutions

- Deployed connected laptops to agents to provide seamless connectivity
- Enabled access to critical insurance claims software
- Provided coverage mitigation through existing MDM policies

Benefits

- Increased workplace productivity for employees
- Enhanced security and control over data usage
- Developed a zero-usage policy for better cost management

Transform your workplace and embrace a new era of connectivity, collaboration and productivity. Contact us today to learn more about how [FlexSpace 5G](#) can empower your organization for success in the digital age.
