

Drive business agility with **Edge Computing**

The power of Edge Computing

In today's hyper-connected world, speed, responsiveness, and scalability are paramount. Edge Computing, with its decentralized approach to data processing and storage, is a game-changer. It enables real-time insights and actions, minimizes latency and enhances overall system performance.

Revolutionize your business with global expertise in Edge Computing

At the forefront of technological innovation, HCLTech proudly collaborates with leading-edge computing solutions to deliver unprecedented advantages to businesses worldwide.

 Remove latency issues	 Increase application performance	 Build more responsive architecture
--	---	---

HCLTech EdgeLITy provide enterprises with a comprehensive approach and solution to architect, deploy and oversee their edge computing environments, ensuring smooth remote operations. EdgeLITy leverages the most innovative edge computing solutions, ensuring a seamless integration of cutting -edge technologies into your existing infrastructure. EdgeLITy offers tailor-made edge computing solutions designed to address the unique challenges faced by enterprises across various industries.

A smart solution to drive innovation and efficiency

 Cloud edge-based solutions support	 Zero-touch provisioning
 Validated stack-based approach	 Smart AI/ML-driven insights
 Vendor-agnostic design and support	 Single pane of view for management
 Seamless IT/OT integration	 Flexible use case -centric approach

HCLTech EdgeLITy offers a single point-of-contact for consultation, assessment, creation, deployment and continued management of your edge computing solution.

A transformational approach

The overall transformational approach is categorized into four key areas to ensure that the enterprise-wide business strategy is aligned with the horizontal organizational requirements, as well as the existing processes and technology footprint. Hence, a well-orchestrated data flow architecture can be established.

Assess

Scan the environment, analyze pain points, readiness for transformation, and the business case, capture data and determine the transformational requirements.

Define

Define business KPIs and artificial intelligence and machine learning parameters, design a detailed technical roadmap, visualize the final solution state.

Build

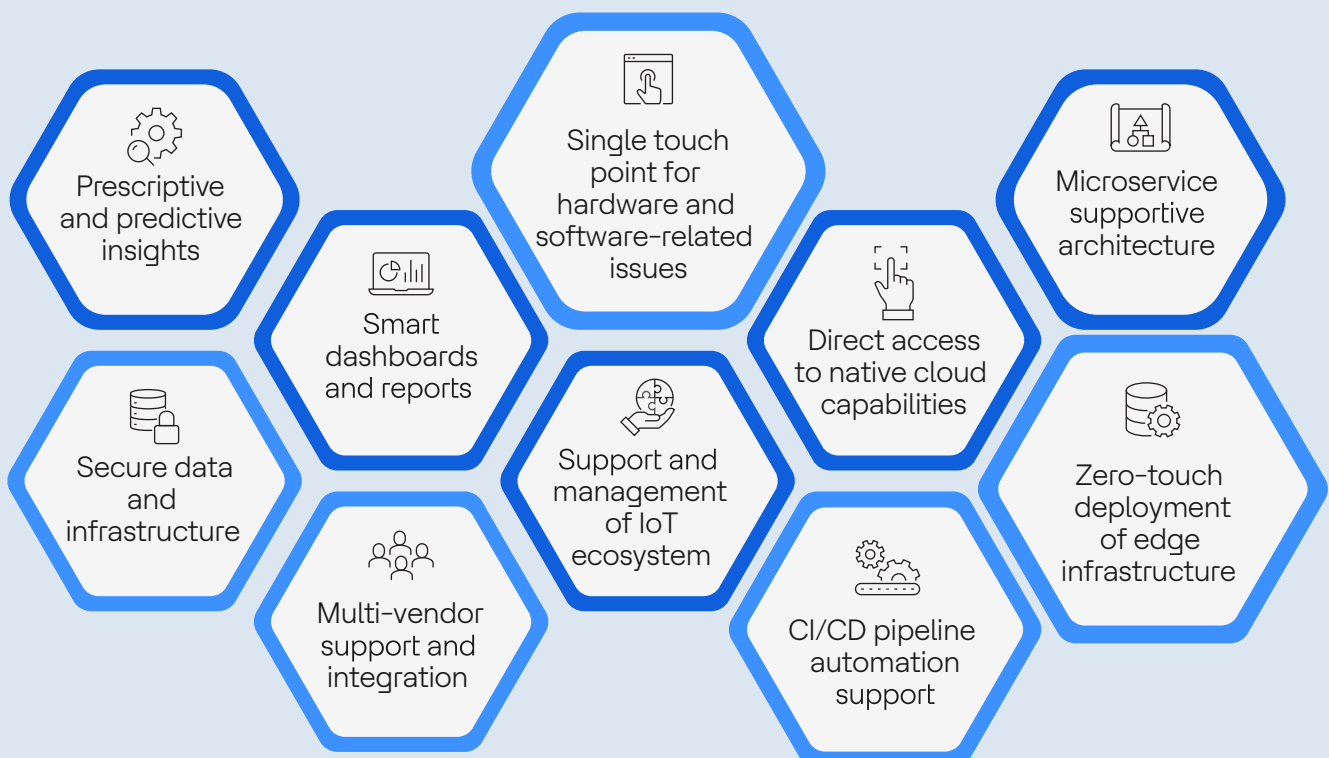

Build the module, prepare the staging environment, perform readiness validation, create digital blueprint, integrate tools and processes.

Run

Steady state operations involving monitoring and management, continuous data refinement and storage requirement, training enablement, and constant review for improvement in design and strategy.

The EdgeLITY advantage

The EdgeLITy promise

- An edge-based processing approach to reduce overconsumption of resources, thereby reducing OPEX cost
- Turnkey, ready-to-deploy solution with up to 30 percent improvement in the production cycle
- Cost reduction of up to 30 percent on cloud infrastructure using automation/runbook
- Enhanced application performance to enable best user experience
- Best-in-class support from HCLTech, one of the top global ERS players, for edge and other services

Why HCLTech

- Leader in all analyst reports for cloud (Gartner, IDC, Everest Group, ISG, Avasant)

- Proven expertise in deploying and managing core IoT workloads

- Dedicated labs to conceive, design and validate customized solutions and new service integrations

- Vertical specific, ready-to-deploy turnkey solutions

- IoT and RoBO edge-ready solutions from HCLTech Cloud Smart suite

HCLTech | Supercharging
Progress™

HCLTech is a global technology company, home to more than 224,000 people across 60 countries, delivering industry-leading capabilities centered around digital, engineering, cloud and AI, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG, and Public Services. Consolidated revenues as of 12 months ending December 2023 totaled \$13.1 billion. To learn how we can supercharge progress for you, visit hcltech.com.
