HCLTech and Microsoft Dynamics 365

Online Readiness
Customer Assessment

Thinking more about **moving to the cloud** but not sure where to start?

HCLTech, a multiyear winner of Microsoft's global Partner of the Year awards, will guide you through this integral process with our Dynamics 365 Online Readiness Assessment, and then help you extend the capabilities of your system with Microsoft Power Platform.

What is the D365 Online Readiness Assessment?

It's an automated tool that analyzes your system and provides us with an insightful, comprehensive list of tasks required for your move to the Cloud.

Each organization has unique challenges, so it is imperative that we take a personal approach that eliminates guesswork and helps you make informed decisions as you plan and prepare. After analyzing your system, we'll engage in honest discussions with you to ensure you feel confident about your journey ahead.

What will we receive after the assessment?

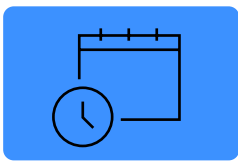

At HCLTech, we pride ourselves on customization and personalization – so **your report will be unique to you.** You'll receive a comprehensive, fully customized Migration Readiness Assessment Report that describes the opportunities and challenges of migrating your system to the Cloud.

Migration Readiness
Assessment Report

How does it work?

Schedule a Call

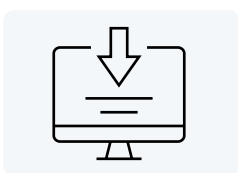

Let's chat! To get started, we need just 30 minutes of your time to discuss the process.

15-Minute Scan

At a time of your convenience, we'll safely and securely conduct a remote 15-minute scan of your Dynamics 365 and Microsoft Business Applications system – including all customizations, configurations, and integrations – so the report will be personalized to you.

(Remember: this is **your** unique roadmap, so we need to analyze **your** environment.)

Receive Your Assessment

After 3 business days, you'll receive a detailed assessment of the opportunities and challenges associated with your Cloud migration, as well as your organization's unique path forward.

Why should my organization move to the Cloud?

- ✓ **Increased Security**
Hosted on Microsoft's trusted and compliant platform
- ✓ **Get More Out-of-the-Box**
Leverage the connected Biz Apps and Power Platform
- ✓ **Mobility**
Mobility is now a true, cost-effective Phase 1 effort
- ✓ **Faster Time-to-Value**
Plug and play with Microsoft's three clouds – natively
- ✓ **Scalability**
Expand as your business requires
- ✓ **Cost Savings**
Reduce your infrastructure costs
- ✓ **Automatic Updates**
Two waves per year chock-full of enhancements

Does Microsoft Power Platform fit with Cloud Migration?

Comprised of Power BI, Power Apps, Power Automate and Power Virtual Agents, Power Platform leverages Artificial Intelligence (AI), Hyper Automation and Mixed Reality to connect systems, automate processes, improve data insight and empower employees to do more. Migrating to the Cloud provides the perfect opportunity to introduce Power Platform Center of Excellence (COE).

Think of it like a car: moving from on-prem to online means the hood is up and the mechanic is poking around, making it an ideal time for engine repairs and upgrades! Of course you'd want only the best mechanic working on your car; similarly, no partner in the channel is better equipped to help launch Power Platform in your organization than HCLTech. And it begins with a Center of Excellence.

A COE drives innovation and improvement by bringing together technical and non-technical people in your organization to share knowledge and success with Power Platform's low-code applications. At the same time, the COE provides the required standards, consistency and governance needed to sustain success.

HCLTech designed a program for organizations looking to reap the most benefits by accelerating their COE and engaging in best practice delivery that addresses specific business requirements and goals. We provide you support in establishing and growing your App Maker Community to ensure citizen development takes off within the guidelines defined.

Simply, we set up your organization for success by getting your system in the Cloud and extending its capabilities with Power Platform.

For SMBs, we can help with Cloud licenses, too!

As a trusted Microsoft Partner, HCLTech has been named a Cloud Solution Provider (CSP), which means that we can not only guide you down the right licensing path but handle the entire licensing process on your behalf, as well.

Benefits of choosing HCLTech as your CSP include:

Break/fix support included in the license cost.

Monthly licensing model – add/remove licensing as needed (yearly is also available, if preferred).

Full control to **self-manage licenses** through **PowerCare**, our customer care portal.

Let's get started!

Is your SMB or Enterprise business considering a move to the Cloud?

Our Cloud Migration experts are ready to help. And it starts with our Online Readiness Assessment. Once that's complete, we can discuss any relevant options, including Power Platform and Cloud licensing. Click below to get started!
