

Accelerated SAP Extended Warehouse Management (EWM) Base90 template

Meet the challenges of digital warehouse evolution

Competition, increasing seasonality of products, faster business cycles, and more frequent mergers and acquisitions are just some of the market conditions placing pressure on warehouses to increase efficiency while still providing the flexibility to handle changing demands.

SAP S/4HANA embedded Extended Warehouse Management (EWM) provides a modern digital warehousing solution that allows you to overcome these challenges. Available to deploy on cloud, on-premise, on hybrid platforms, SAP EWM smartly manages inbound, outbound, internal warehousing, and 3PL operations with new digital technologies.

This functionality can transform your operations. And our Base90 solution can get you there faster.

HCLTech's Accelerated SAP EWM Base90 template

Our Accelerated SAP EWM Base90 template delivers rapid SAP EWM implementations, with up to 90% of processes coming straight out of the box.

What Base90 provides

Our template provides a defined implementation methodology, preconfigured solutions, accelerators, predeveloped project documentation, and delivers a preconfigured SAP system.

Built on SAP Business Suite, Base90 is supplemented by a vast library of preconfigured best practices, flows and scripts, step-by-step user guides, data load and conversion templates, and industry specific reports and dashboards.

Key features

Newly identified SAP S/4HANA EWM business models, innovations, simplified best practices, and processes

20+ key reference standard SAP best practice processes with documentation, configurations, and data model successfully tested for SAP S/4HANA compatibility

Add-on 14+ preconfigured SAP S/4HANA EWM business processes

Add-on 12+ preconfigured SAP S/4HANA decentralized EWM business processes

12+ custom SAP S/4HANA BTP-based EWM mobile apps

HCLTech's automated SAP S/4HANA Smart Conversion tools for faster conversions

Preconfigured template for SAP S/4HANA Transportation Management (TM), Logistics Business Network (LBN), Yard Logistics (YL), EWM integration

Simple user experience with Fiori apps and mobile apps

On-premise, cloud, and hybrid deployment options

10 data load accelerators

HCLTech's SAP EWM Base90 template

Ready to use documentation: fact sheet, process flows, test scripts

Hosted sandbox

Preconfigured reference processes

Preconfigured SAP S/4HANA EWM environment

Agile project toolchain with SolMan, Focus Build, JIRA integration

Predefined workshop templates and system demonstrations

Intelligent Robotic Process Automation – ideation phase

Data migration templates

Out of the box integration to SAP TM, LBN, Yard Logistics, and 3PLs

Optimized for Activate+ project methodology

Benefits – Reduce project timelines by 20%-30%

Our Base90 accelerators bring multiple benefits to any SAP S/4HANA project, including:

Accelerated design and validation – focus on adopting the available SAP best practice, rather than “reinventing the wheel” or blueprinting

Reduced project timelines by 20%-30% – driving a faster return of investment

Simplified user adoption

Ensured compatibility with future innovations and simplifications

SAP Extended Warehouse Management service offerings

In addition to our Base90 template, we provide an inclusive set of SAP EWM service offerings, ranging from advisory to designing a responsive warehouse and enabling you to handle complex logistics operations. These include:

Consulting and advisory

Support and maintenance

Proof of concepts, assessments, proof of value, and optimizations

Migrating from legacy/ third-party WMS applications

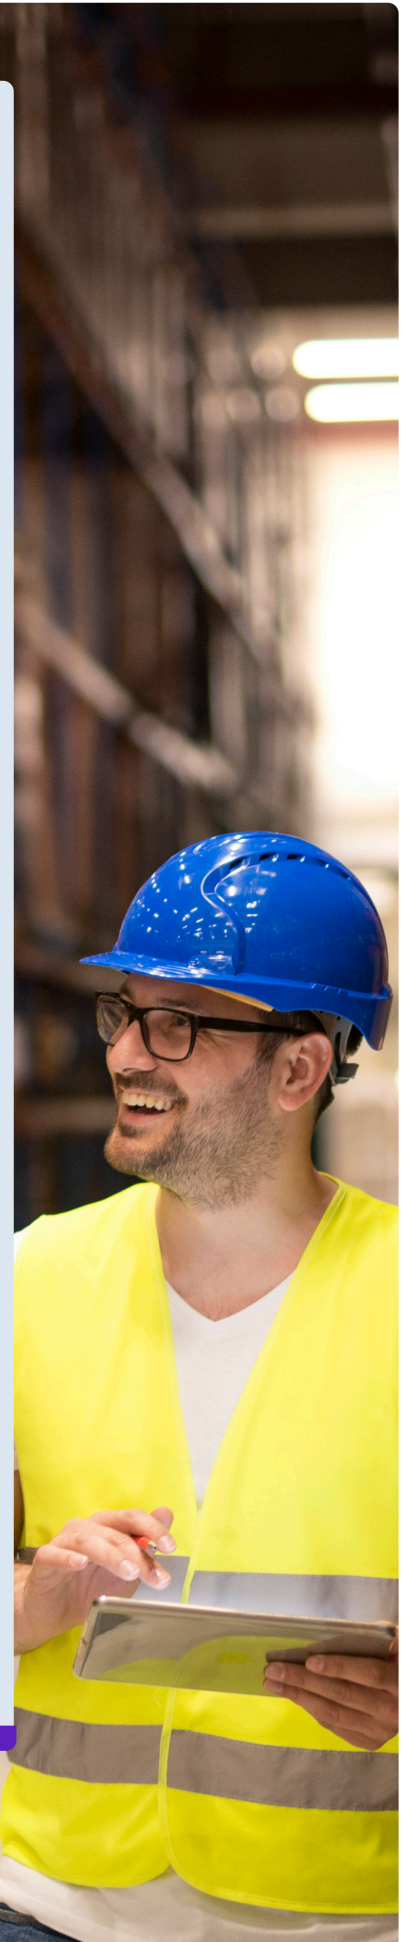

EWM implementation, upgrades, and global rollouts

EWM deployment packages for small, mid-size, and large warehouses

We will help you leverage SAP EWM to align all internal warehouse processes with the layout—inbound and outbound, internal goods movement, physical inventory, production staging, interleaving, value-added services, cross-docking, slotting, and shipping.

We can also integrate mobile radio frequency devices without adding middleware and enhance current inventory capabilities with real-time stock visibility, a monitoring cockpit, and smarter storage options.

Why HCLTech? Our focus on value realization

Leveraging 15+ years of experience in SAP supply chain and logistics management, we design and build solutions that optimize warehouse operations and drive business value. We focus on innovating and integrating the different layers of supply chain execution, covering warehousing and logistics effectiveness, automation, inventory controls, resource cost control and optimization, new business models, processes, and analytics.

We take a unique benefits realization approach to customer engagements by committing to guaranteed outcomes, such as lowering transportation costs or better asset utilization. The following are examples of value drivers and benefits realized by our customers:

Improved on-time delivery performance

by automating and integrating warehouse and distribution processes

Improved warehouse operations efficiency

by automating processes for inbound/outbound shipments, cross docking, and physical inventory counting

Better resource utilization and efficiency

by optimizing warehouse resources and operations, and improved planning of inbound/outbound shipments

Improved supply chain FTE productivity

by automating processes for full control of warehouse operations

Optimized warehouse space utilization

through automated storage and handling systems, improving productivity

Reduced inventory carrying cost

by enforcing better inventory management procedures to reduce shrinkage and obsolescence

Reduced days in inventory

by providing real-time visibility into inventory positions

Reduced total logistics cost

by improving efficiency of operations across planning, warehousing and fulfillment processes

Reduced IT spend

by having ERP and specialized warehouse management capabilities on a single platform

Reduced warehouse management cost

by streamlining inbound/outbound and internal warehouse activities

About HCLTech's SAP practice

To get the best return on your digital investments, you need a partner that doesn't just do SAP right, but does it better. Our SAP practice works seamlessly with HCLTech's digital consulting, engineering services, IoT WoRKS™, and cloud infrastructure practices to design, implement, and support tomorrow's integrated, intelligent solutions today. As an SAP Global Strategic Services Partner, our 10,000+ consultant base leverages insights, advanced accelerators, and industry-acclaimed frameworks to deliver award-winning services from local offices across Europe, Africa, Asia, and the Americas.

HCLTech | Supercharging Progress™

BI-104223330866875478-EN00GL

HCLTech is a global technology company, home to more than 223,400 people across 60 countries, delivering industry-leading capabilities centered around digital, engineering, cloud and AI, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology and Services, Telecom and Media, Retail and CPG, and Public Services. Consolidated revenues as of 12 months ending June 2023 totaled \$12.8 billion. To learn how we can supercharge progress for you, visit hcltech.com.
